ACADEMY

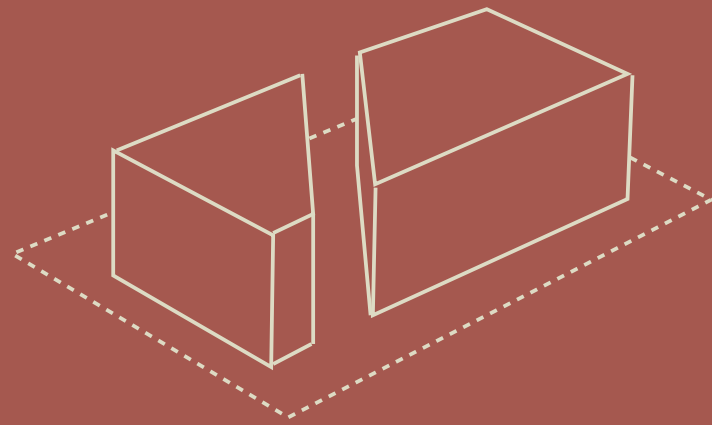

LEONARDO MORARETI

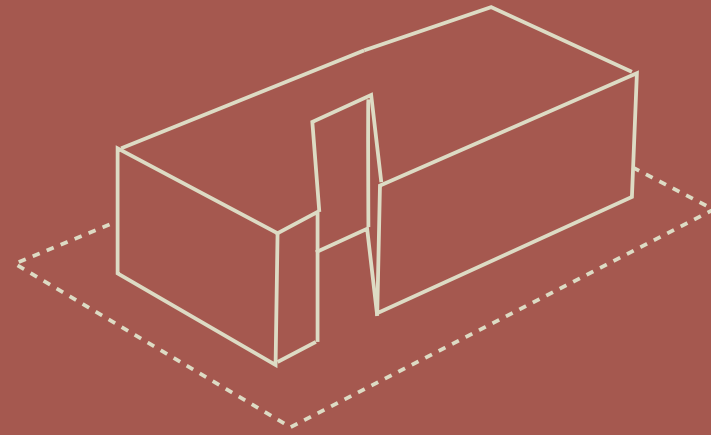

SITE + VOLUME

Establish the buildable envelope

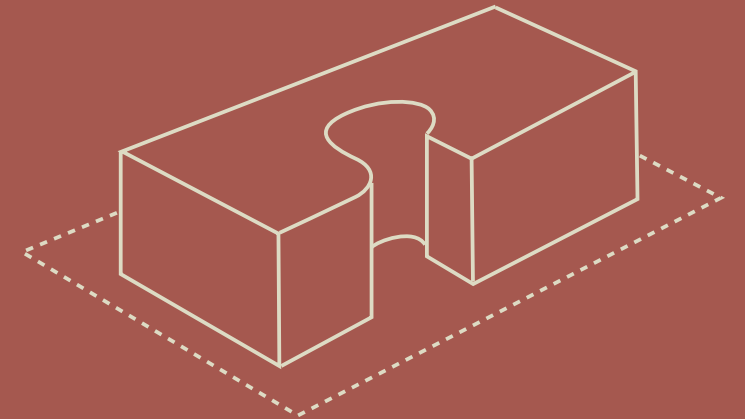

CARVE + CONNECT

Establish the buildable envelope

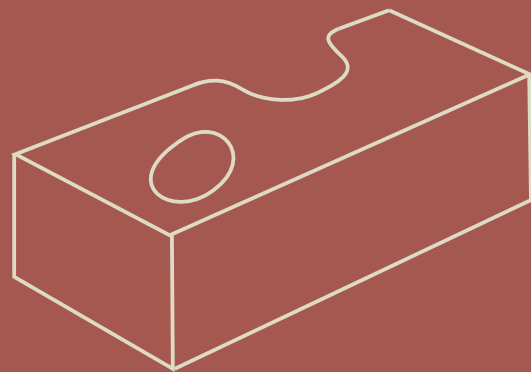

ENTRANCE GATEWAY

Establish the buildable envelope

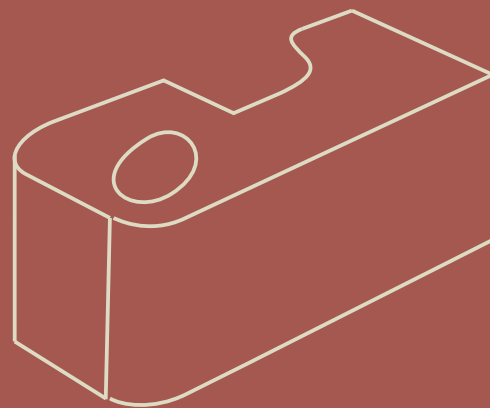

CURVE DESIGN

Shape building around dance movement and spatial flow.

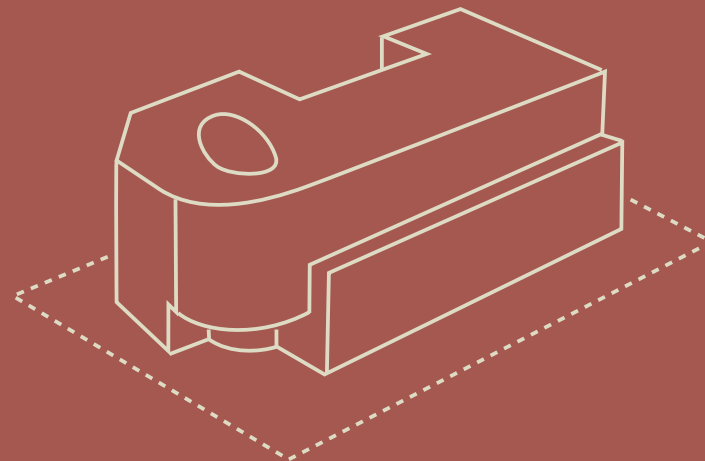

ROOF OPENING

Create an atrium like space by installing a skylight

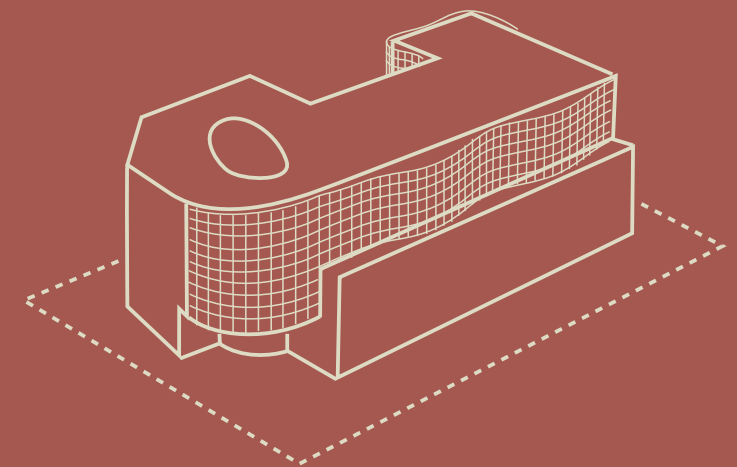

CURVE EXTERIOR

Enforce the spatial flow of the space

FINALIZE BUILDING MASS

Extrude walls to give space for the auditorium
Frame the entrance of the building

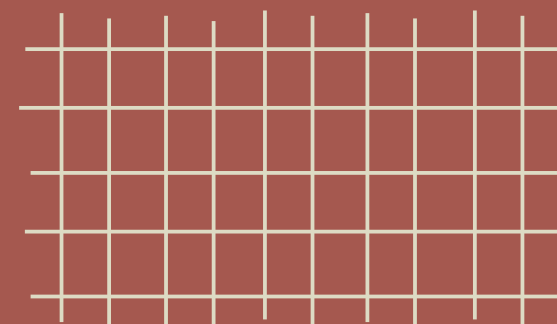

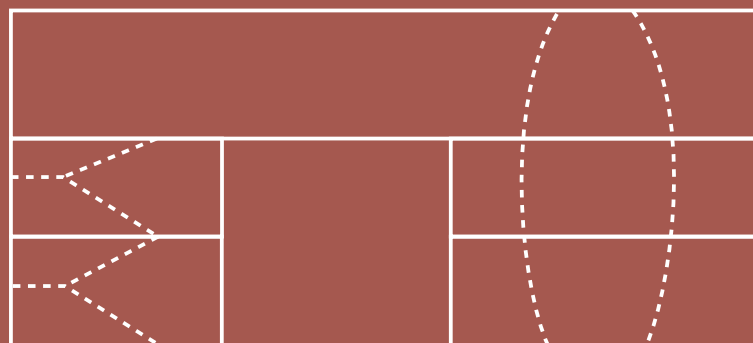

DOUBLE SKIN CONCEPT

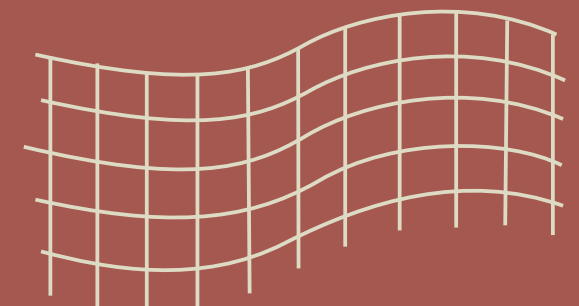

Introduce a secondary skin that wraps the building creating momentum and depth.

SEPARATION OF SPACES

Separate private areas for dancers to public areas like the cafe.

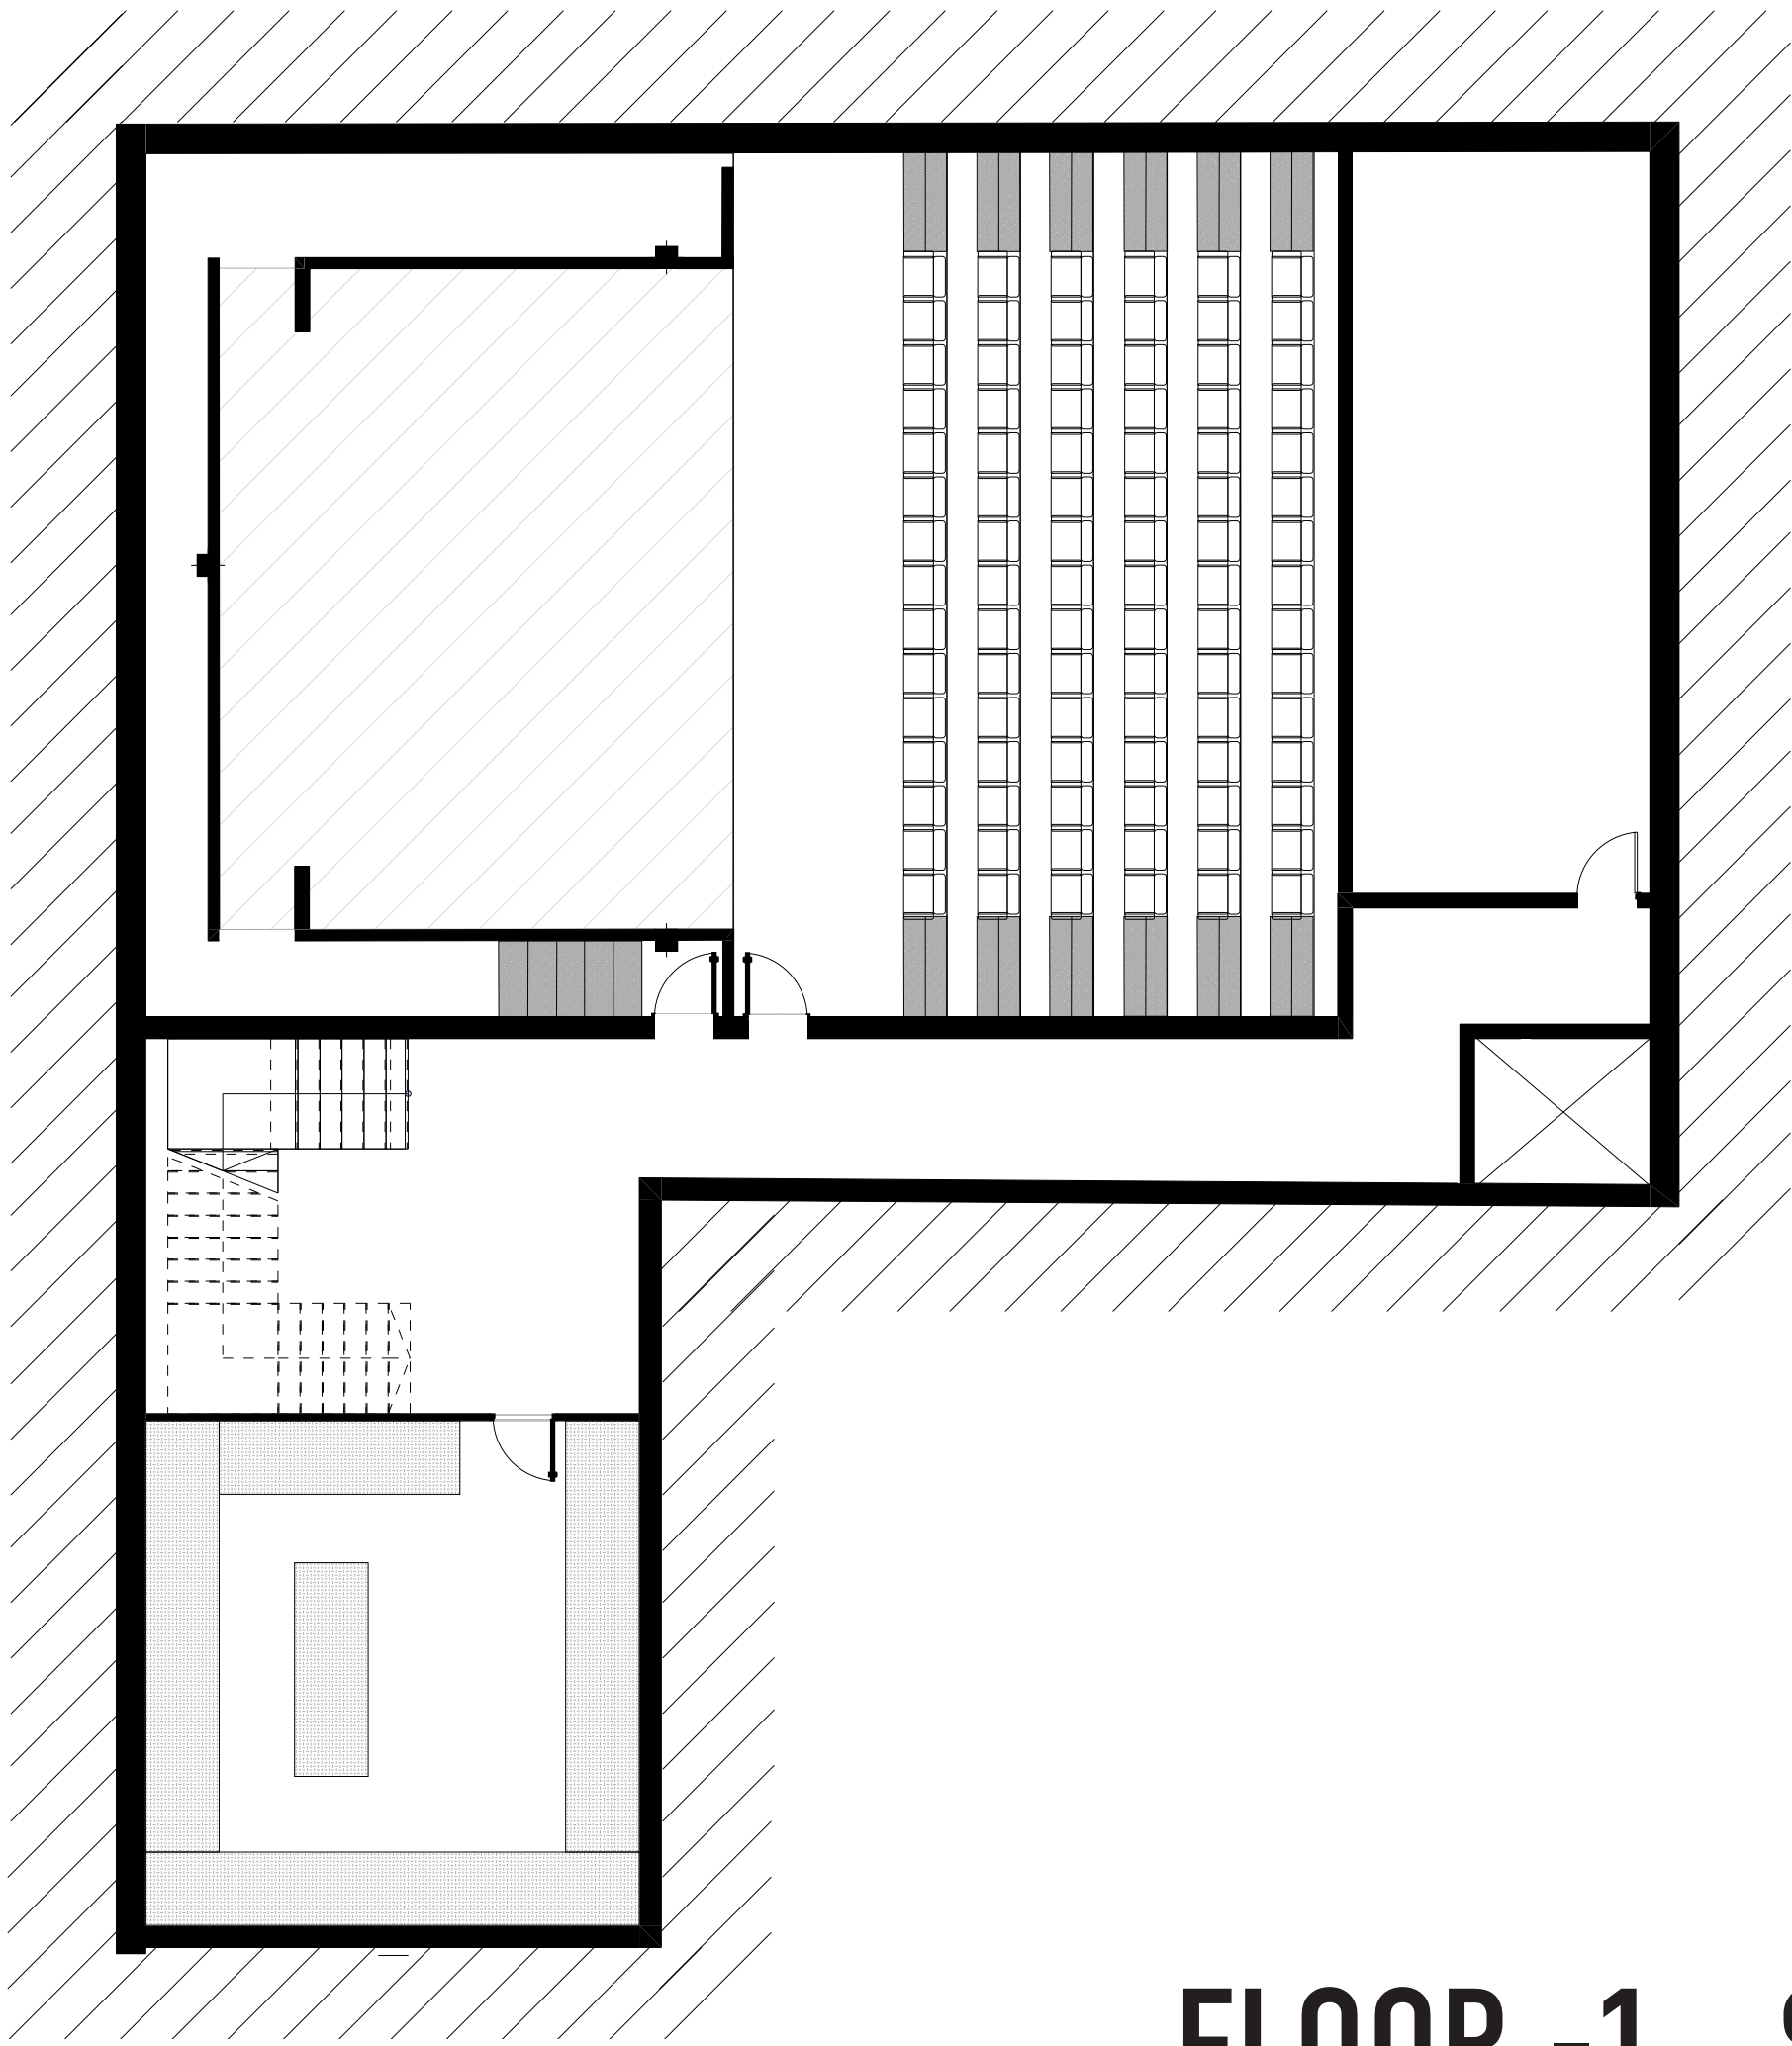

MOIRE EFFECT

This architectural section drawing illustrates a multi-story building with a central vertical circulation core. The structure is defined by thick black lines representing walls and floors. On the left, a large room contains a tiered seating arrangement. The central core features a staircase with multiple landings and flights. To the right, the building is divided into several rooms, some of which contain tall, narrow vertical elements, possibly bookshelves or storage units. Elevation markers on the right side indicate the following levels: +12,100 (top), +7,600, +3,600, and +0,100 (ground level). The ground is represented by a hatched pattern at the bottom of the section.

- 1 **Terracotta lattice**
 Custom terracotta modules
 Non-structural double skin facade
 Provides minor shading and texture
- 2 **Vertical Support**
 Powder coated aluminium
 Fixed to structure
- 3 **Horizontal Support**
 Aluminium horizontal rails
 Hold terracotta elements with hidden clips
- 4 **Structural wall**
 Reinforced concrete wall
 Primary structure
